Class of 2021, Graduated with 99.2 average in class of 500 + students.

Experience

University of Toronto Sports Analytics Group

2022-2026

- President from April 2025 to May 2026. Previously Vice President, Executive and general member.
- Established and maintained partnerships, including the launch of the MLSE data challenge at UofT, as well as others with Canada Basketball, Stathletes, and sponsorships from the Blue Jays, TISS and CANSSI.
- Placed 9th in NFL Big Data Bowl 2024, out of over 300 submissions, with [“Every Step You Take: Measuring A Defender’s Moves”](#) , a Kaggle submission which used actual NFL tracking data to evaluate how defenders prevent expected yards with their movements, winning 5000 USD.
- Winning graduate category of SMT data challenge in 2023, by evaluating first baseman’s catching ability, winning 2000 USD and presenting at Carnegie Mellon University.
- Finalist for LINHAC 2023, with focus on the value of hits in the SHL.
- Presented tutorials to club members, including topics of CNNs, classification and tracking data visualization.

Consulting Intern

Toronto ON/Remote, CA

Posterity Group

May 2024 - Aug 2025

- Analyst on policy driven fuel switching R&D study, which aimed to evaluate peak impacts on electricity in different scenarios. Lead analyst on half of deliverables. Project success resulted in doubling of budget and opportunities for future work.
- Industrial analyst for electric and gas based long term resource plans, including presenting work to client and documenting work for legal filings.
- Converting 5000 line VBA macro to python and optimizing for 10x reduction in runtime.
- Designing Power BI dashboard for city of Edmonton to present benchmarking information to the general population, bringing project to close under budget.
- Conducting Undergraduate Thesis with PG in 4th year of academics, with focus on long-term forecasting with Bayesian time series.

Research Assistant

Edmonton, AB, CA

University of Alberta, Lab of Dr. Richard Thompson

Summer 2023

- Created and used Matlab code to numerically compare CT scans and MRIs of the same patient.

Summer Research Student

Edmonton, AB, CA

University of Alberta, Lab of Dr. Adetola Adesida

Summer 2021 and 2022

- Researched effects of mechanical environments on cartilage tissues, in a sterile wet lab environment.
- Critiqued relevant academic papers in a collaborative environment.

Skills

Programming: Python (including pandas, polars and torch), C, Matlab

Languages: French (Professional Working level)

Microsoft: Proficient in Word, Excel, PowerBI
